

Website Name: DJ Amor: Music

Topic:

The purpose of this website will be to promote my own business right now of being a DJ. This website will be able to show the experience that I give and examples of packages that I can bring to the table such as speakers and setups. It will also give a background of my experience in music and performing as well as a resume. Finally, this website will give people the ability to contact me for my services, where they can request certain types of gigs and packages that I offer. Overall, this is a website to promote my job as a DJ so that I can have more outreach into the City of Columbia.

Sections:

1. Home: The home page will give a basic overview of DJ Amor. It will have a picture in the background and a link to all of the other sections. This page will give a description of myself and what I do and draw them in to the rest of the page.
2. Experience: This page will act as a resume. On this page, there will be work experience of bars that I have been at. This page will contain links to the bar websites, videos, and examples of events that I have played for. This page will sell me as a DJ and make people want to hire me.
3. Packages: This page will display the packages that I offer as a DJ and pricing. One will be a no-speaker package and a speaker package. One is where I bring the necessary speakers and the other is if they already have the speakers set for me to use. In this page, there will be links to request time and dates for performances. This data will be emailed to me so that I can respond if I am available or not.
4. Highlights: This will be a page that I regularly update with recent videos from gigs that I perform at.
5. Contact Me: This will be a page where the user inputs name, number, email, and other information with a message to me. This will allow people to contact me with any questions that they have regarding hiring or anything else.
